Work Experience

Computer Science Tutor

Aug 2026 - Present

Siena University

- Simplified complex CS concepts, terms, and theories for better student comprehension.
- Engaged with beginner CS concepts to enhance understanding while advancing in higher level classes.

Student Research Assistant

May 2025 - Aug 2025

Siena University

- Learned and used Manim, a Python-based animation software, to develop several educational math-explainer videos.
- Worked collaboratively with ChatGPT to streamline the learning and development processes.
- Presented and explained my project to peers and professors at an academic showcase.

Projects

Project/Task Manager

Python, FastAPI, SQLite, Pydantic, JavaScript

- Developed a full-stack project and task management application using Python, FastAPI, SQLite, Pydantic, HTML, CSS, and JavaScript, implementing a RESTful API with CRUD functionality.
- Designed a modular backend architecture separating API routing, business logic, and database operations, with relational project/task data and Pydantic-based input validation.
- Built a responsive frontend that communicates with the backend API to create, view, edit, and delete projects and tasks, demonstrating end-to-end application development and client-server integration.

Internship Application Tracker

React, TypeScript, Vite, Recharts

- Developed a responsive internship tracking dashboard with status filtering, search, sorting, and persistent browser storage.
- Implemented interactive application analytics and data visualization using React state management and Recharts.
- Designed and deployed a responsive web application using CSS, GitHub Actions, and GitHub Pages.
